

Confero CAM

Hands-Free Camera Director

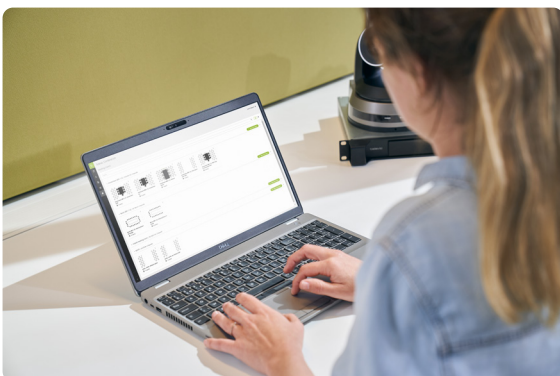

CONFERENCE

Confero CAM, your hands-free camera director, adds out-of-the-box camera control to your meeting room. As a result, you do not need a production team to deliver a professional and engaging video output for participants of a hybrid meeting or viewers of a live stream. Confero CAM enables effortless meeting capture, streaming and increased engagement for your hybrid meetings.

Ultimate Flexibility

- + Support multiple meeting room setups
- + Handle larger rooms with support for up to 8 cameras
- + Two camera shots for each seat
- + Wide range of supported IP cameras
- + Modular solution that easily grows with your needs

EASILY SWITCH BETWEEN SEVERAL ROOM LAYOUTS
SERVING MULTIPURPOSE SPACES

Powerful Now, Scalable Towards the Future

We've built Confero as a powerful and scalable conference meeting platform. With a Plexus Gateway available in the room, adding extra capabilities is as easy as adding licenses. No additional hardware investment is required so you leverage your initial investment.

The Confero platform currently exists of the following capabilities :

- + **Confero PLAN:**
meeting preparation and agenda management
- + **Confero CAM:**
hands-free camera director
- + **Confero MEET:**
hybrid meeting with moderation capabilities

Addition of Confero PLAN and / or MEET will also provide additional functionality to Confero CAM.

Simplified Installation and Design Choices

One Device, Lots of Firepower

The Plexus gateway combines camera control, video switcher and streaming device in a single box. Moreover, it's readily available as no PC is required to get the solution operational. As the configuration is web-based, no installation is required and the software is always kept up-to-date.

Efficient and Cost Effective

The speed for the installation can be reduced drastically. Instead of waiting for the equipment to be shipped, the configuration of the room layout with seats and cameras can be prepared upfront in our Confero platform.

A single person can configure ideal camera shots for each position by moving from seat to seat and seeing the result right in front of them in the user interface.

Being an out-of-the-box solution, no scarce control programming resources are needed to build a bespoke.

Optimize Cabling

From an installation point of view a single CAT5 cable provides power, control and video signals.

Less cabling requirements provide more flexibility in mounting the cameras at the optimal spot in the room resulting in better camera shots of the participants.

Choose Your Camera Brand

Besides the Lumens and Avonic cameras, an extended list of widely used cameras is supported and will grow over time.

For more details about the supported camera brands, consult our website: <https://www.televic.com/en/conference/confero#conferocam>

Features

Confero CAM

- + Remote configuration via the Confero Cloud platform
- + Possibility to add multiple room layouts
- + Seat and camera setup
- + Support up to 8 IP cameras Full HD
- + Video output of the Gateway: 720 p
- + Camera tracking configuration:
 - Visibility of all active seats and cameras
 - Possibility to choose the brand and model of the cameras (see list on our website: <https://www.televic.com/en/conference/confero#conferocam>)
 - Real-time video preview during configuration
 - Camera controls: zoom in/out, pan/tilt, precise/slow, rough/fast)
 - Possibility to preset 2 cameras per seat (1 primary camera + 1 secondary backup camera)
 - Possibility to review camera presets for each seat
 - Possibility to preset 2 cameras for the wide shot
 - Room layout zoom in/out
 - Editable and deletable presets
 - Possibility to assign name overlay (separate Confero PLAN license required)

Latency

The Gateway latency is 50 ms.

Supported Conference Devices

- + Confidea G4
- + Confidea G3 (coupling with Plixus AE-R is required)
- + Confidea FLEX
- + Confidea T
- + Confidea F
- + uniCos

System Requirements

- + Compatible browsers: latest version of Google Chrome or Microsoft Edge
- + Plixus Central Unit: AE-R or MME (CRP 7.3 or higher), WAP G4
- + Plixus Gateway (to be ordered separately)

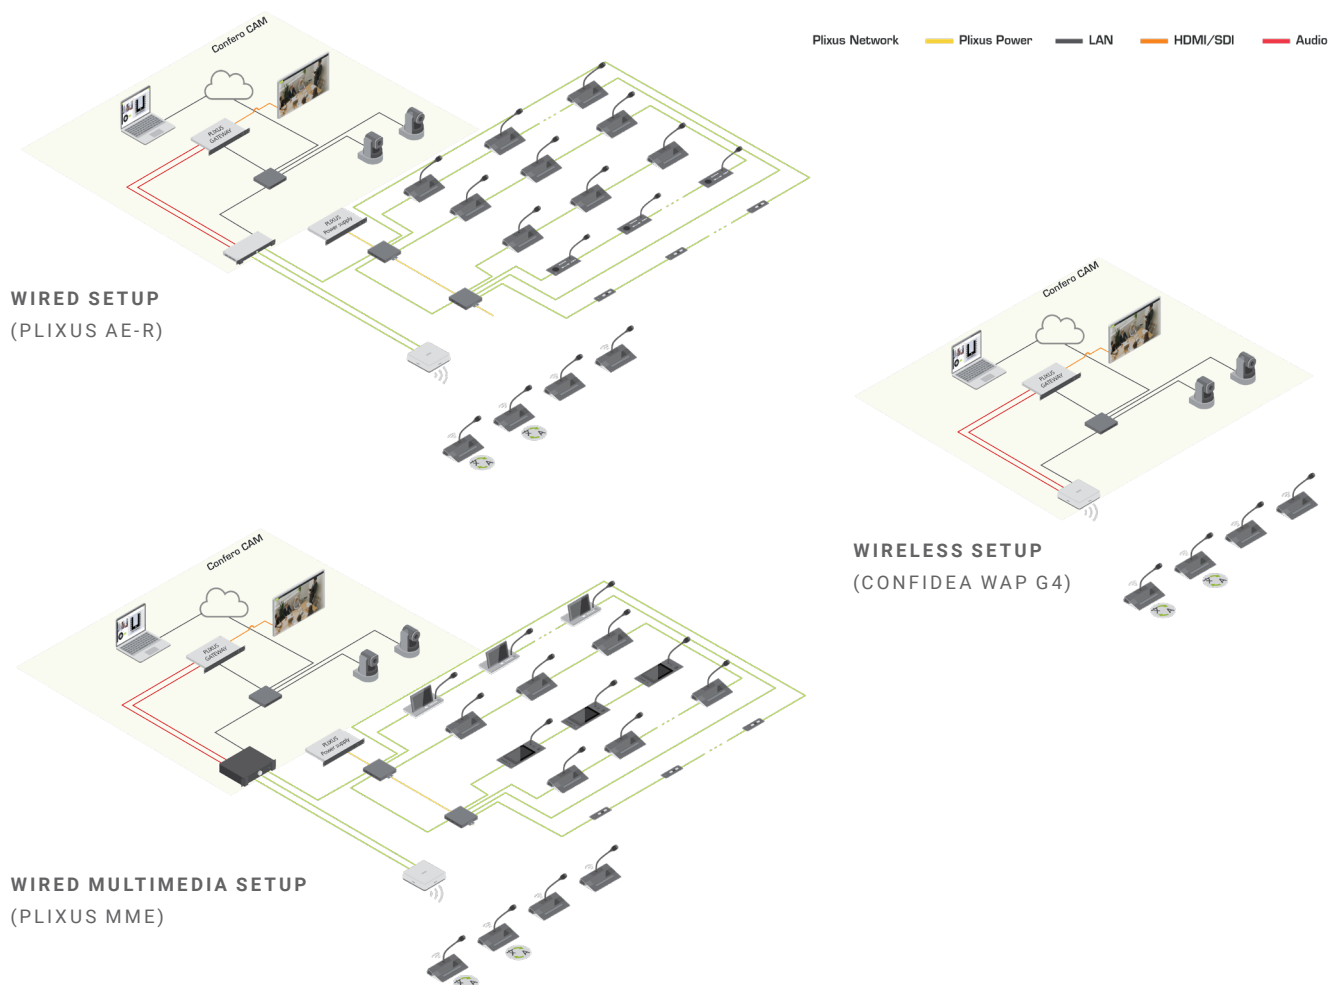

License

- + 71.98.3120 - Confero CAM

This license includes feature updates and basic maintenance.
